About Azyntrex

[Azyntrex Tech Services Pvt Ltd](#) is a fast-growing technology-driven company focused on building scalable digital solutions, modern web applications, SaaS platforms, enterprise systems, automation tools, and innovative IT services for global clients.

At Azyntrex, we believe in building future-ready technology with creativity, performance, and innovation at the core. We provide an ecosystem where developers can learn, innovate, collaborate, and grow into industry-ready professionals.

Role Overview

We are looking for passionate, creative, and problem-solving Software Developers who are eager to work on real-world applications and modern technologies. The ideal candidate should have strong logical thinking, programming fundamentals, and the ability to work in a collaborative environment.

Candidates will work on:

- Web Applications
 - SaaS Platforms
 - Enterprise Software
 - APIs & Backend Systems
 - Database Management
 - Cloud-based Applications
 - Automation & AI-integrated Solutions
-

Key Responsibilities

Freshers

- Assist in developing and maintaining web applications
- Write clean, efficient, and reusable code
- Work with frontend and backend technologies
- Debug, troubleshoot, and optimize applications
- Participate in code reviews and technical discussions
- Learn and adapt to new technologies quickly
- Collaborate with senior developers and project teams
- Maintain proper documentation of projects and modules

Experienced Candidates (2+ Years)

- Design and develop scalable software solutions
- Build secure REST APIs and backend systems
- Optimize application performance and database queries
- Lead modules/features independently
- Mentor junior developers and interns
- Participate in architecture planning and deployment
- Work with cloud platforms and DevOps workflows
- Ensure coding standards, security, and best practices
- Coordinate with clients and project managers when required

Required Skills
